To facilitate selling and make it convenient for home owners to select and take along plants when visiting our nurseries, we maintain a Sales Department where choice freshly dug plants are available and on display.

We have an excellent stock of bearing-age Fruit Trees, Berry Bushes, Grapes, Rhubarb, etc.

Flower and Vegetable Seeds, Lawn Seed, Fertilizers, Insecticides and Garden Sundries are stocked for your convenience.

## LANDSCAPE SERVICE

Artistic and satisfactory landscape effects are the result of careful planning and the proper use of the right material.

Why not consult us about your landscape problems? Suggestions and advice will be gladly given.

## GUARANTEE

(In conformity with uniform guarantee as adapted by National Landscape Nurserymen's Association.)

Provided account is paid within 30 days, and plants have received reasonable care and protection, we will replace at one-half original cost all woody plants furnished and planted by us which fail to survive one growing season. Guarantee does not apply in cases of loss due to drought severe winter, storms, insect injury, or factors beyond our control.

If plants to be replaced are out of stock, credit will be applied to other plants.

## PLANTING

The cost of planting, if we do it, is borne by the purchaser. Our charge merely covers the cost of labor, fertilizers, etc.

## DELIVERY

On large orders, where they can be combined, we intend to give free delivery within a radius of 30 miles from our nursery. On smaller orders a nominal charge for delivery will be made unless otherwise arranged at time of sale.

## Ornamental and Shade Trees

IN ADDITION to the trees which are valued for their shade, there are flowering trees which, at different times during the spring and summer, shower the lawn with their bloom. Do not forget that while shade trees add materially to the property value and landscape charm of your home, the initial cost is very small as compared with the enjoyment that you receive. The average shade tree is a long investment and returns your money manifold throughout the years of its usefulness.

The abbreviation "cal." means the caliper or diameter of the tree 6 inches above the ground.

## Flowering Shrubs

WHETHER planted individually or collectively, shrubs are an important feature in the adornment of any grounds. In groups they can be made to emphasize some feature of the lawn, to screen the garage, the laundry-yard, or some unsightly view. Among borders of the lawn, along walks and drives and in corners, collections of shrubs may be gathered that will give a succession of bloom from early spring until fall. In the list that follows will be found shrubs for all such purposes.

### Prices for Shrubs, except where otherwise noted:

	Each		Each
2 to 3 ft.	\$0 75	5 to 6 ft.	\$2 00
3 to 4 ft.	1 00	6 to 7 ft.	2 75
4 to 5 ft.	1 50	7 to 8 ft.	\$3.50 to 5 00

Except where otherwise noted, a charge will be made for digging shrubs with ball of earth (B&B) as follows:

	Each		Each
1 to 2 ft.	\$0 30	5 to 6 ft.	\$1 00
2 to 3 ft.	45	6 to 7 ft.	\$1.25 to 1 75

### *A Few Practical Hints on Planting*

Always keep roots covered when plants are out of the ground. Dig hole large enough to receive plant without bending roots. Break up subsoil and mix it thoroughly with rotted stable manure.

Set plants slightly deeper than they stood at the nursery. Work in good soil among roots so as to leave no air-pockets. Fill hole and tamp soil down thoroughly with the heel of shoe. Leave slight depression around plant to catch the water, and water thoroughly.

A booklet with more detailed planting instructions will be gladly sent upon request, free of charge.

## Broad-Leaf Evergreens

WITH few exceptions, no grounds, either small or extensive, should be without some representative of this rich and interesting group of plants. They endure shade, and their rich blossom and foliage effect makes them almost indispensable. Certain varieties of this class, such as Rhododendrons, Azaleas, and Laurel, ordinarily grow more satisfactorily and show to better advantage when planted in rather heavy masses. A deep, cool, moist subsoil, with proper drainage, is ideal. As a rule, they dislike lime, or limestone soil, and success will be more certain on such soils if they are planted in woods earth or mulched with peat moss. Oak leaves are ideal for covering the ground beneath them.

## A Safe Investment

Planting is one of the few investments which do not depreciate. It always brings increased returns in actual value and satisfaction. Shade trees, ornamental trees, and flowering shrubs create value that increases the worth of a property at least 20%. The return is immediate and it increases every year.

# Evergreen Hedges

From time immemorial people have used hedges and fences to protect their property from intrusion and to secure privacy. Until recently an evergreen hedge meant quite an expense, but they have now come down to a price-level within the reach of every home-owner.

## ARBORVITÆ

**Pyramidal.** Because of its shapely habit of growth and deep green foliage, this makes a very fine hedge.

EACH season of the garden year brings its share of surprises. In spring the bulbs thrust lusty spikes of previously formed flowers through the damp earth. In early summer the rose unfolds in all its beauty; in midsummer shaded porches and terraces provide a welcome relief from the hot sun. In autumn the fruits of shrubs and trees add to Nature's pageant of color; leaves turn color and fall and the hoary frosts anticipate another season of rest for the plant world. This whole cycle means much to all of us, and each change brings new pleasures to those who work and live outdoors.

# Fruits

In the extremities of the lawn or upon the adjoining lot, plant fruit trees. They will bountifully reward you in the fruit they yield, which you will enjoy eating right from the trees or in winter as preserves and jam. The fruit-garden can easily be made a part of the scheme for beautifying your property. Flowers along the walk to the orchard will brighten the way and provide blooms for cutting.
